1. Scope

This document highlights the high-performance of PROMISE PegasusPro R16. The PegasusPro Series supports digital collaborative editing of 4K/5K video formats using Adobe Premiere Pro editing over 10G Ethernet. The PegasusPro Series enables multiple editors to move video footage and other production assets to and from the PegasusPro Thunderbolt™ 3 Direct Attached Storage (DAS) volume to a Network Attached Storage (NAS) volume, and supports simultaneous playback and editing of 4K/5K video without frame drop. Additionally, a separate Pegasus3 or Pegasus32 system can be directly attached to the PegasusPro R16 via Thunderbolt™ 3 as a separate volume available to the host administrator.

PegasusPro R16 includes the famous PROMISE hardware RAID to protect your digital assets in the event of a hard drive failure.

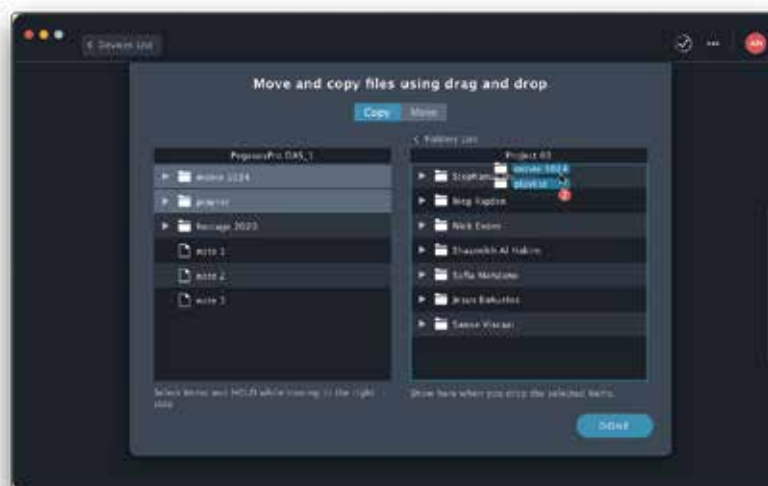

2.Executive Summary

The PROMISE PegasusPro Series features FileBoost, a proprietary breakthrough technology that facilitates high performance DAS-to-NAS and NAS-to-DAS file transfer. Upon loading the needed video assets, the user can edit ingested data from 4K/5K cameras.

PROMISE hardware RAID technology with HDD or SSD in the 16-drive PegasusPro R16. The combined performance boost reduces time required for all participants, representing a vast improvement in post-production workflow for collaborate editing of multiple streams in ProRes 422 (HQ) and ProRes 4444 XQ video using Adobe Premiere Pro Productions.

FILE BOOST
The hidden force.

3.Use Scenario

- The data presented was created with a Mac OS X platform connected to PegasusPro R16 in Device Mode using Adobe Premiere Pro Productions.
- This test cycle compares PegasusPro performance equipped with 3.5" HDD in an A/V environment application. Multiple-stream playback, editing, with video/audio overlay were applied in this test.
- A/V Streaming Passing Criteria is set to reasonable frame drop on 5120 x 2700 30 FPS, 3840 x 2160 30 FPS video format for ~1 hour streaming with multiple Mac clients playback and editing over a 10G network.

3.1 Configuration and Topology

System configuration on Mac Platform:

Platform OS	Mac OSX 10.15.6
Platform Spec	New Mac Pro(2019) CPU: 3.5G 8 core Intel Xeon W Memory: DDR4 32GB GPU: AMD Radeon Pro Vega II Duo 32GB
Application SW	Adobe Premiere Pro 2020 (14.3.1)
Storage Spec	PegasusPro R16
Storage Configuration	WD 18TB HDD * 16 → Build RAID 5 (Using default Stripe/Sector size)
Video Format	3840 x 2160, 30 FPS, ProRes 4444 XQ 5120 x 2700, 30 FPS, ProRes 4444 XQ
Interface Type	10G Base-T Networking (with Cat6e Cable)
PROMISE Product	PegasusPro R16 CPU: Intel® Core™ i7-8700 CPU@ 3.20GHz RAM: 64GB (16GB * 4)

3.2 Test Procedure Summary

To prepare for multiple users collaborative editing, all video footage and audio transferred to NAS volume.

- 1 Create a Premiere Production plus several sub-projects:**
Select and open a new production and requisite files to import.
- 2 Operate multiple clients to open the same Production:**
Select sub-projects and import footage and add into Sequence.
- 3 Adjust the “Zoom Level” and “Playback Resolution”:**
Set “Zoom Level” as 50% and “Playback Resolution” as 1/2 in each client.
- 4 Enable “Frame Drop indicator” in playback window:**
This indicates any frame drops that occur during playback testing.
- 5 Start playback in each client:**
Click “Start” button in each client, and playback for 1 hour.

Adobe Premiere Pro

4. Test Results and Conclusion

PegasusPro Device Mode + Adobe Premiere Pro via 10G Network:

A. Up to 5 Hosts for 4K(3840 x 2160) editing on PegasusPro R16 HDD SKU + Adobe Premiere Pro							
PegasusPro R16 (HDD, RAID5)							
Resolution	Codec	Frame Rate	Data Rate	Zoom Level	Playback Resolution	# of Hosts Editing & Previewing	Result for playback 1 hour
3840 x 2160	ProRes 4444 XQ	30FPS	1.7 Gb/s	50%	1/2	4	No Frame Drop
3840 x 2160	ProRes 4444 XQ	30FPS	1.7 Gb/s	50%	1/2	5	1000~1200 Frame Drop

B. Up to 3 Hosts for 5K(5120 x 2700) editing on PegasusPro R16 HDD SKU + Adobe Premiere Pro							
PegasusPro R16 (HDD, RAID5)							
Resolution	Codec	Frame Rate	Data Rate	Zoom Level	Playback Resolution	# of Hosts Editing & Previewing	Result for playback 1 hour
5120 x 2700	ProRes 4444 XQ	30FPS	2.2 Gb/s	50%	1/2	2	No Frame Drop
5120 x 2700	ProRes 4444 XQ	30FPS	2.2 Gb/s	50%	1/2	3	1000~1200 Frame Drop

5. Conclusion

The PegasusPro Series R16 performs extremely well with no frame drop for the lower number of hosts tested, and acceptable frame drop for the higher number of hosts in the tests. DAS/NAS high performance editing and sharing is made possible using proprietary technology created by industry leader PROMISE Technology. To help make collaborate editing more effectively. FileBoost technology, exclusive to the PegasusPro Series, enables high performance post production workflow with multiple editors over NAS. Users quickly ingest footage and share with other editors and production staff.

With Thunderbolt™3 and 10G Network ports, uploading and sharing high resolution video is extremely fast. PegasusPro Series models are ideal for filmmakers, photographers, graphic designers and other multimedia professionals, especially on set – where speed and efficiency are crucial.
