

Qvest.Cloud

Q.Create

Cloud-based post-production with Adobe

Streamline your cross-company post production using Q.Create. With applications for editing and comprehensive project management, this ready-to-use package is specifically designed for supporting freelancers, agencies and small businesses in worldwide and location-independent collaboration.

Easy Deployment

No technical knowledge is required. Q.Create is pre-integrated, cloud-hosted and fully managed by Qvest Media.

Creativity First

Focus on your creativity. Workflows, projects, user profiles, and preferences are automatically managed in the background.

Collaboration

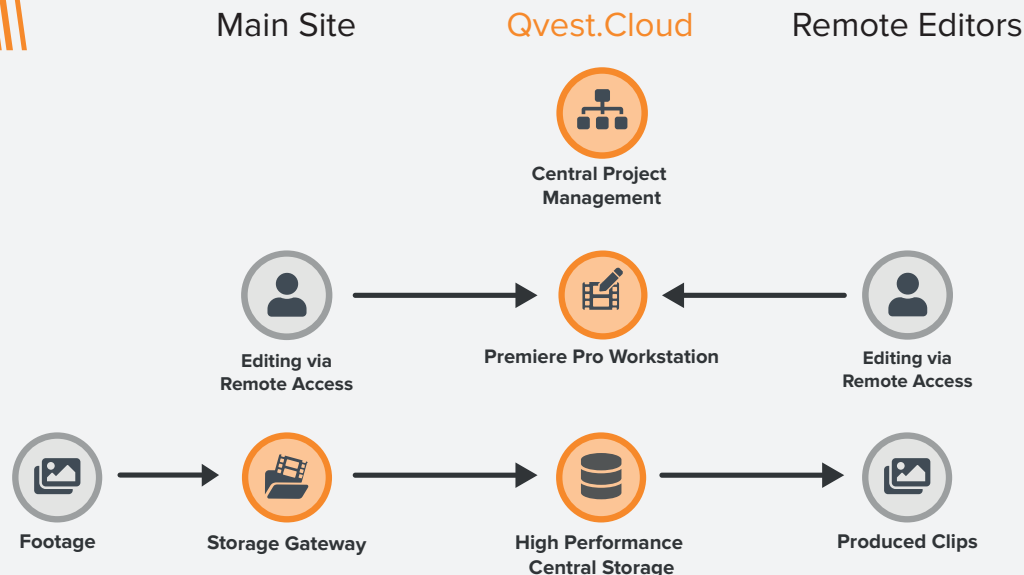

Flexibly work together. Access media assets from your browser and start editing from anywhere at any time.

Comprehensive Toolbox

For professionals, Q.Create provides applications and features for ingest, editing, asset management, and many more.

Workflow

Included & optional apps from:

Key features

Editing Workstation in the Cloud

Instant provision of as many and as powerful Premiere Pro workstations as you like to match the needs of your current project.

Central Storage

All workstations access the same high performant and scalable storage. Content is transferred as accelerated bulk transfer or browser-based upload.

Low Latency Access

Securely access the virtual workstation from anywhere in the world using your regular PC and benefit from a full frame rate confidence monitor.

Global Collaboration

Collaborate with a global workforce with access to the same, secure infrastructure for everyone, without the need to distribute and ship your content.

Managed Working Environment

Find your personal working environment readily prepared on any workstation, with the proper templates for your current work.

Automated Material Flows

Use administrator-defined automated flows to prepare imported material or render, transcode and publish finished clips.
