

We are Trint. We go beyond automated transcription using AI to provide the world's most innovative platform for searching, editing, collaborating and getting the most out of your audio and video content.

BEYOND TRANSCRIPTION

KEY FEATURES

Easy Upload: Drag and drop audio and video files into Trint

The Trint Editor: Trint's web-based editing platform lets users polish AI-generated transcripts to perfection

iOS Mobile App: Lets users record interviews and meetings on their iPhone and upload and collaborate from anywhere

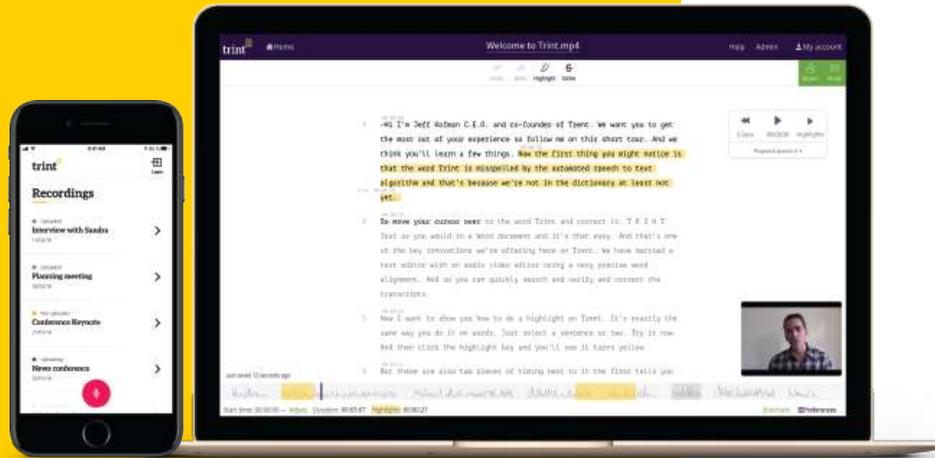

Searchable Content: When files are transcribed, you're left with a searchable archive of all your audio and video files

Multiple Languages: Available in three English accents (US, UK & Australia) and 12 other languages (including French, German & Spanish)

TRINT FOR PREMIERE

Seamless integration into Adobe® Premiere Pro® software video editing platform

The Trint Editor glues the original audio to the text on the screen, making content **instantly searchable and easy to verify**

BUILT FOR ENTERPRISE

API for Enterprise integration

Single Sign On: Seamlessly integrate corporate email systems into Trint

Enterprise Dashboard: Create internal teams for sharing and collaboration, monitor usage, designated administrators control access

Secure Data: No one sees your data but you, ISO/IEC 27001 forms the bedrock of our security

Reach Multiple Platforms: Quickly and effortlessly transcribe audio and video files, making it easy to distribute content to multiple platforms at the same time, including social, digital, TV and radio, audio, video, and print

Export Formats: VTT + SRT (for captions); MS Word (text); EDL (edit decision list)

DW Deutsche Welle

The New York Times

TRINT'S CEO & FOUNDER

"As a reporter I spent thousands of hours of my life transcribing. I often dreamed of something that would make it easier. Trint does just that. I think of it as transcription relief." - Jeff Kofman

Jeff is an Emmy award winning journalist and worked for nearly 30 years as a reporter, foreign correspondent and war correspondent for ABC, CBS and CBC News.

During his time as a journalist, he estimates he manually transcribed thousands of hours of interviews, speeches, lectures and news conferences.

USERS TRINT

"I don't endorse many products - but not many help journalists like @TrintHQ. Transcribes video. Load it up - sit back. **Jaw dropping.**"

Al Tompkins

Poynter Institute for Media Studies

"This has not only saved me hours of tedious work, but it has allowed me to really make the best of every segment I do."

Ignacio Torres

Nightline, ABC News | New York

"WOW! Absolutely AMAZING. I shot the video interviews. Sound was very good. I outputted audio files and used Trint. For speakers who speak clearly and without too many stops and starts this software was **close to FLAWLESS**"

Trustpilot

"For us, Trint is one of the fastest and cheapest ways to get high quality transcripts. Its greatest added value lies in the intuitive editing tool that combines the audio file with the associated text."

Joel Kaczmarek

Editor-in-chief/podcaster, Digital Kompakt
