

The screenshot displays the MediaHive user interface. At the top, there are navigation tabs for 'CLASSIFICATIONS', 'LOCATIONS AND FOLDERS', and 'SEARCH'. A search bar is present with a search icon and a 'Search' button. To the right of the search bar are options for 'Save Search', 'Favourite Search', and 'File'. Below the search bar, there are filter options for 'Extension Filter' and 'Creation Date Filter'. The 'Extension Filter' has options for m2m, m2s, m2t, m2ts, and m4a. The 'Creation Date Filter' has a date interval set from 2021-11-08 to 2021-11-30. The main content area shows a grid of 15 items, with the first row containing three items: a video of a person with a camera, an audio waveform, and a video of people on a street. The second row contains three items: a video of a woman, a video of a UNHCR emergency in Afghanistan, and a video of people on a beach. The third row contains three items: a video of a hand on a keyboard, a video of a person's face, and a video of the Earth from space. The interface includes various icons for actions like 'Show detail', 'Order By', and 'Direction'.

- Advanced Search Google-style
- Powerfull Search Engine based on Elastic search
- Thesaurus Support
- Custom query saved, user based profile search.

- Version management and preview individual segment
- Unlimited segments for each EDL
- Unlimited EDLs for each file
- Table of Content (TOC) for index the video as a chapter
- Export EDLs
- Conforming a new file based on EDL
- Frame accuracy
- Mark in / out
- Subclip generation
- Independent metadata assignable to both clips and subclips

SailGp Edl Metadata

Project preparation for Adobe Premier

- Supports on Mac and Windows
- Possible to add entire file
- Possible to add a single segment from an EDL

The screenshot shows the MediaHive interface for a project named 'Story for Promo'. The 'STORYBOARD' tab is selected, displaying a list of video segments. A context menu is open over the 'FILES' section, showing options like 'View', 'Edit', 'Delete', and 'Export to ADOBE' with sub-options for 'Windows' and 'MAC'.
